

# JORIS DELACROIX

A pianist since his childhood in the South of France and fed by the French Touch scene, Joris Delacroix has enjoyed a fast-growing success for the past ten years. He has most notably gained recognition with his hit single ***Air France*** as well as the albums ***Room With View*** and ***Night Vision***. With a debut in UK House music influences before moving on to techno, his remarkable identity is defined by melodic synth hooks, hypnotic beats and inventive breaks: all of which come together to create powerful and emotional songs. Joris received support from industry giants such as **Dancing Astronaut, CLASH Magazine or Wonderland**.

Following his performance for Cercle, he freed himself from all remnants of the old music industry and released two singles on his own label, ***Homie*** and ***Unexpected*** which received huge support from the electronic scene and well-deserved press coverage (**DJ Mag France, Traxsource, Stereofox...**). He then collaborated with NTO, French 79, Joachim Pastor and Romain Garcia to remix the single ***Seasons*** which received more than 2M streams already.

To date, Joris Delacroix has earned over 75 million plays across all across streaming platforms; He recently signed a license deal with **Armada**, label of Armin Van Burren, and began a European tour following the release of his last collaboration with his friend Joachim Pastor, tilted ***Swaying***, a powerful track well received by the public.

He is back in the studio since a couple months cooking a round of fresh tracks to be release very soon.
