

TEHO - BIOGRAPHY 2023

ENGLISH (LONG) :

Rising star in the world of electronic music, Teho was born in 1990 in a small town near Montpellier, in the south of France.

At the age of 11, he picked up a bass guitar and began trying to play all the songs he loved. Teho's musical journey took a turn when he discovered electronic music at the age of 15. However, it was seeing Daft Punk in concert two years later that inspired him to start producing his own music. Influenced by James Holden and Stephan Bodzin, Teho naturally gravitated towards a melodic techno style.

In 2010, at the age of 20, Teho signed his first EPs and had his first gigs, showcasing his talent with a unique "Live set" format. It was during one of these performances that he met NTO, who would later help Teho in his creative process, even making a remix for him.

Teho's music began to take him around the world in 2012, when he played his first gig abroad at the « Module club » in Tokyo, Japan, followed by gigs in Germany, Belgium, and England.

By 2014, after several label signings, Teho had a breakthrough moment when he released two EPs on the prestigious Stephan Bodzin's label, Herzblut recordings. From there, his career continued to flourish, and he played more and more gigs, cementing his reputation in the electronic music world.

In 2016, Teho felt a desire for greater artistic freedom, and he created his own label, "Labo T", a sound laboratory where he could experiment with new styles and aspects of his music.

The following year, Teho participated for the first time on the Cercle show, a live set streamed from Colorado Provençal in Rustrel, France.

Continuing to assert his musical identity, and joining the line-ups of major festivals in Europe, Teho had the desire to create a long format album.

In February 2020, he released his first LP « Polytone » on Labo T. The album showcased Teho's ability to mix different influences from all over the world and create his own new vision of electronic music.

« Polytone » was supported by several artists such as Joris Delacroix, Joachim Pastor, and Ron Flatter, with remixes specially made for the project.

In May 2021, Teho was once again featured on the Cercle show, this time for a short format story filmed at Glacier 3000 in Switzerland. The video garnered worldwide attention from media outlets such as The Times magazine, BBC, CBS News, and France TV.

In 2022, Teho released his second LP, "Infinity", with a concept of creating an abstract projection, allowing everyone to imagine what they wanted. The album featured appearances from Einmusik, Joris Delacroix, Aalson, Aparde, pølaroit, Jonas Saalbach, Romain Garcia, and Ceas and received an overwhelmingly positive response from fans and fellow artists alike.

Today, Teho has found his place in the electronic music scene, with his own style both dreamy, melancholic, and yet full of energy. He has successfully combined different musical genres to create his distinct musical universe and hybrid style which makes him a prominent figure in the electronic music scene. With millions of streams on his tracks and Live performances all over the world, Teho has established himself as a force to be reckoned.

ENGLISH (SHORT) :

With his own style both dreamy, melancholic, and yet full of energy, Teho has successfully combined different genres to create his distinct musical universe.

Having the recognition from his peers notably with releases on Cercle records, Herzblut recordings, Sapiens, his desire for greater artistic freedom pushes Teho to create his own label, "Labo T", a sound laboratory where he could experiment with new styles and aspects of his music.

Today, with millions of streams on his tracks and playing his Live performances all over the world, Teho has established himself as a prominent figure in the electronic music scene, a force to be reckoned.
